DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-12 & 17-28, drawn to a decision feedback equalizer, classified in class 375, subclass 233.
 - II. Claims 13-16 & 29-32, drawn to a transmitter for single carrier modulation, classified in class 375, subclass 301.

The inventions are distinct, each from the other because of the following reasons:

Claim Group 1 consists of a group of claim limitations which disclose a decision feedback equalizer device and method. The material in this group of claims is classified in primary class 375, subclass 233.

Claims Group 2 consists of a group of claim limitations which disclose a transmitter system and method which uses single carrier modulation means. The material in this group of claims is classified in primary class 375, subclass 301.

2. Because these inventions are independent or distinct for the reasons given above and there would be a serious burden on the examiner if the restriction is not required because the inventions have acquired a separate status in the art in view of their different classification, restriction for examination purposes as indicated is proper.
